

An Adobe Acrobat Tutorial from STM

Making online documents larger

The key to magnifying online documents is the Acrobat "Select & Zoom" tool located here.

If you do not see this tool, then right-click on a blank spot on the tool bar (like here) and left click here to check the "Select & Zoom." Then use the + / - buttons or type in a percentage of you choice.

Updated 1/5/10
Acrobat 8.0 is shown here.
